

POSTDOCTORAL FELLOW POSITION OFFER

We offer a **1 year (plus 1 year) postdoctoral** fellow position in the research project **Information overload in multilevel agent-based complex networks** financed by Excellence Initiative – Research University Programme.

Successful candidate is expected to work toward understanding the collective phenomena related to the dissemination of information and information overload (IOL) at different levels (including the issue of interactions between levels produced by IOLs) using interdisciplinary methods of statistical physics – agent modeling and complex network analysis.

- Place:** Group of Physics in Economics and Social Sciences at the Faculty of Physics, Warsaw University of Technology (Poland)
- Start:** 1st January 2024
- Duration:** 2 years (1 year + 1 year after positive evaluation)
- Enumeration:** 8000-9000 PLN net (ca 1800-2000 EUR net) per month + health insurance + social benefits
- Additionally:** possibility of up to 3 months of visits to the Partners of the EU HE MSCA Staff Exchange OMINO Project (<http://ominoproject.eu>)
